EXPERIENCE

Internship Studio Intern | March 2024 - Present | Tirupati, India

WordPress CMS Development

- Learned fundamental principles of content management systems.
- Gained hands-on experience in managing digital content effectively.
- Understood and utilized key features and functionalities of WordPress.
- Learned to navigate the WordPress dashboard and use essential plugins and themes.

Unschool Intern | Dec 2022 - Feb 2023 | Tirupati, India

Python Full Stack Flask | ReactJS | Bootstrap

- Utilized React.js for building dynamic user interfaces.
- Implemented responsive design using Bootstrap.
- Created server-side logic and RESTful APIs using Python Flask.
- Managed routing and middleware to handle client requests efficiently.
- Connected the application to MongoDB for data storage and retrieval.
- Designed and implemented database schemas to support application features.
- Understood the end-to-end process of website creation from frontend to backend.
- Ensured seamless communication between frontend and backend components.

PROJECT(S)

Aaharadhaan Python Flask | ReactJS | Bootstrap | MongoDB

Problem: Many people face food scarcity, a lack of essential items, and insufficient educational resources.

- It facilitates food donation by connecting users with excess food to those in need, aiming to end hunger and reduce food waste.
- Additionally, the platform supports other types of donations, such as books, blood, clothes, and funds, prioritizing requests based on user needs.
